Here is Host list which having favorably met the expectations of ecolooP (Start and use) :

_ Steinberg Cubase

_ Fruity Loop

_ SaviHost

_ VSTHost

_ Bidule Plogue *(It's better to deactivate the audio engine before the load of EcolooP and to reactivate it after)*

_ Sensomusic Usine

_ Cockos Reaper

_ Ableton Live ?

_ Synthedit 1.1 et 1.2

_ Mulab

_ Orion

_ Toby bear minihost

For this quick tutorial, we are chose the Hermann Seib '**SaviHost**' which can allow you to open EcolooP in 'Stand Alone'.

Now, start **EcolooP_Island_1_9.exe**

for start this Quick Tutorial...

This is what you see after the launch of EcolooP

*Now, Load '***MusicRadar23_100BPM .wav***' file Delivered with the EcolooPStartKit in Sample Slot n°1 (by means of 'Load Sample1' button).*

Now, you must to unlock the sample slot for after press 'Update Eco Sample' button

   +

This is what you would see :

*Now, you can open the midi file by clicking to **'File'***

'MusicRadar23_100BPM .mid'

and put the midi trigger to 'OK'

For Play the sample, Active Gate Sample :

_ While the sound plays, Press 'To Master' in left of 'Gate Sample' button

_ Click in the FX menu dropdown list and select an Master module. Disable 'Bypass' button. Move the controls and listen !

_ You can also move 'Pitch offset' and keep the same tempo while being able to change the pitch !
